Cognition +

Senior Software Developer

About Cognition+

Cognition+ is a team of talented and dedicated people on a mission to deliver transformative digital solutions to insurance companies of all sizes. In addition to a fully customizable Enterprise Insurance Management Platform, Cognition+ offers on-demand support, connectivity, cybersecurity, and development services. Founded in 1993, we have gained a deep understanding of our client's business needs and challenges and have invested in R&D to build the next-generation of insurance technology solutions.

With a focus on teamwork, commitment, and trust, we know it takes people with diverse perspectives, ideas, and cultures to make a company succeed. We believe that hiring the best talent will lead to the creation of better products and services to keep our clients on the leading edge. If you are looking for a challenging opportunity for your work to make a lasting impact and your career to grow then we want to meet YOU!

Why Choose Cognition+

- Competitive compensation package including benefits, group RRSP and incentive plan;
- Flexible work hours that offer work/life balance;
- Opportunity to learn, grow and innovate;
- Friendly and supportive team environment; and,
- Opportunity to provide your input into making this organization successful.

The Role

We are looking for a senior full stack developer to join our Development Team. The Senior Software Developer will have the opportunity to work collaboratively with a cross-functional team to enhance an enterprise software system. This position will help design, develop and test components of a multi-tiered solution.

This position can be performed from our office in London Ontario or remotely within Canada. Remote based employees may occasionally be asked to travel to our office for meetings or team building events.

Role Responsibilities

- Design and develop new software applications or enhance current applications;
- Fix customer issues;
- Conduct testing and analysis;
- Work with senior team members to design migration solutions, including development of specifications to ensure quality;
- Create and maintain key documentation; and
- Perform other job-related duties as assigned.

Required Qualifications & Skills

- 5+ years of experience developing with:
    - JavaScript frameworks/libraries, especially Angular
    - Java/J2EE/Spring MVC
    - HTML5/CSS3, especially Bootstrap and Responsive Design techniques
    - Tools: Node.js/NPM/Yarn/SCSS/AngularCLI;
- A Bachelor's degree in Computer Science or equivalent education and/or experience;
- A demonstrated familiarity with current software industry trends and emergent technologies;
- Strong OO analysis and design skills; and
- Proven diagnostic, analytical, problem solving skills, and attention to detail.

Nice To Have

- JUnit experience;
- Agile experience;
- Sound knowledge of enterprise design patterns;
- Application Server experience, especially Wildfly; and
- Deployments targeting Windows/CentOS operating systems.
